Employment history

Web Developer

Campaign Nucleus — Oct 2023 - Present

- Streamlined front-end operations by leading the transition of key features from Vue2 to Vue3.
- Enhanced feature set by both designing and developing robust, scalable solutions for high-impact projects.
- Ensured high-quality code through meticulous reviews and feedback processes.
- Conducted and organized meetings on a regular basis for front-end team

Front End Developer

BackIt — Aug 2022 - Oct 2023

- Developed responsive web pages using Vue, HTML, CSS, and JavaScript to enhance the user experience and improve the overall performance of the website.
- Utilized Vue3 Composition API to accommodate larger-scaled projects
- Conducted regular competitor analysis to identify opportunities and make recommendations for improving the website's overall look and user experience
- Designed, implemented, and deployed MVP within 4 months
- Used JIRA/Confluence on a daily basis to manage and complete tickets

Front End Developer

Veedback — Sep 2020 - Aug 2022

- Collaborated with the marketing team to create visually appealing and user-friendly website designs that align with the company's branding and messaging strategies.
- Began and continued in a UX/UI Design role alongside this Front End Development role
- Implemented i18n localization standards to boost accessibility
- Created wireframes and prototypes to test and validate user interfaces
- Successfully implemented an app redesign with a turnaround time of 7 days, resulting in an increase in customer response rate for brands.
